LPI - Custom Personnel Lifts and Work Platforms

LPI, Inc. Lift Systems specializes in the design, fabrication, and installation of standard and custom personnel lift systems and work platforms. Our lifts are used for a variety of applications including:

- Paint Finishing, Material Handling, Welding / Assembly, and Maintenance
- Wash down, Clean Room
- Blast Booth / Room, Fall Protection / Safety

LPI's personnel lifts can be found in numerous industries including Aircraft & Aerospace, Construction and Agricultural Equipment, Electrical Power & Distribution, Light Rail & Bus Manufacturing, Military Equipment, Rail Car & Locomotive Manufacturing, Rail Systems, Transit Authorities, and Trucks & Recreational Vehicles.

Our Commitment to Quality

For 30 years, LPI, Inc. has been the recognized leader in manufacturing ergonomic personnel lifts and work platforms. Our personnel lift and work platform products range from single stage scissor platforms to 3- and 4-axis lift systems; and from one person stationary scissor lifts to multiple axis gantry platforms.

Our sales engineers will work closely with you to develop the best lift for your specific applications. They are backed with a team of electrical, mechanical, and design engineers ready to utilize the latest in design and machinery technology to provide a solution for your specific application.
