With 30 years experience, LPI is the recognized industry leader in manufacturing lifts. Challenge us with your application.

Designed to assist in paint applications, product access, and ergonomic positioning in a wide range of industries.

This lift is designed to ride on a rail system very similar to an overhead crane.

With 3 axes of movement, the operator can safely position the lift platform into a location that will improve ergonomics and productivity. The lift's features create a flexible work environment that allows adaptation to different product configurations and environments.

Standard and custom designs are available.

LPI will work with you to create a cost effective and productive solution for your application.

Applications

- Fall Protection / Safety
- Ergonomic Positioning
- Washing / Prepping / Sanding
- Paint Application
- Grit and Sand Blasting
- Maintenance
