

BOOST[™]
LPI LIFT SYSTEMS[™]

SELF-PROPELLED PNEUMATIC ELEVATING WORK PLATFORM

Pneumatic lifts are suitable
for use in paint booths
and other hazardous
locations.

**ROBUST &
RESPONSIVE
VERSATILITY FOR
MANY APPLICATIONS!**

LPI[®]
LIFT SYSTEMS

Maneuverability at your fingertips!

Now more than ever companies need a competitive advantage and a way to increase profit margins and productivity all while catering to their hard working employee. The BOOST lift is the perfect solution! The BOOST lift provides an ergonomic work platform with maneuverability to get around the product without leaving the lift. The zero turn radius and individually controlled drive motors simplify driving and repositioning so the worker can be more productive. The BOOST lift maintains LPI's standards for high quality, durable lift products and provides all the necessary features to keep your employees safer, allowing them to be focused on the job at hand.

Benefits

- Vertical platform travel from 25in. (lowered) up to 10ft. (raised) provides a working height up to 16ft. which eliminates the need for ladders.
- Increased productivity as a result of the operator never having to leave the platform for repositioning.
- For use in paint booths or areas where combustible vapors may be present (air supply source required).
- Zero turn radius for easy maneuverability in tight spaces.
- Reliable performance and minimal maintenance due to a direct-linked lift mechanism. No chains or cables!

General Specifications

- 30ft. operational travel distance
- 40 scfm @90psi compressed air source required
- Single operator, 300lbs. (max.)
- Total weight (approx.): 1,000lbs.
- Platform controls include:
Up/Down - Drive/Steer
Emergency Stop
- Base controls include: Emergency descent
- Equipped with filter/regulator/lubricator

Features

ROBUST DESIGN & QUALITY COMPONENTS FOR MAXIMUM DURABILITY

TOOL TRAYS

HAND CONTROLS FOR HORIZONTAL & VERTICAL TRAVEL

AUXILIARY AIR CONNECTION FOR AIR TOOLS OR CUP GUNS

STATIC DISCHARGE GROUND REEL KIT (OPTIONAL)

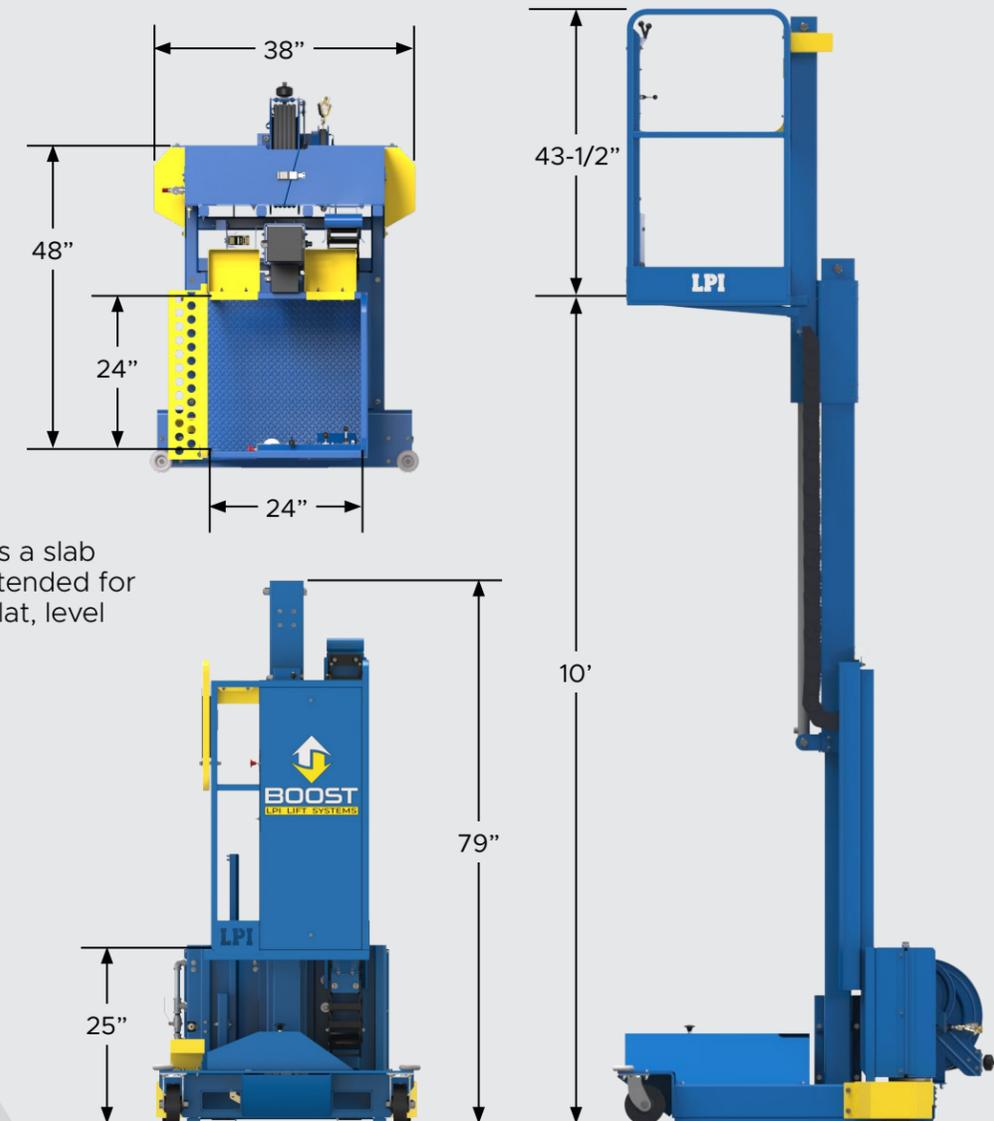

35FT. INDUSTRIAL GRADE RETRACTABLE AIR HOSE FOR 30FT. OF OPERATIONAL TRAVEL

LUBRICATION & FILTRATION SYSTEM FOR LONG-LASTING RELIABLE PERFORMANCE

MULTIPLE BUILT-IN SAFETY FEATURES/FUNCTIONS

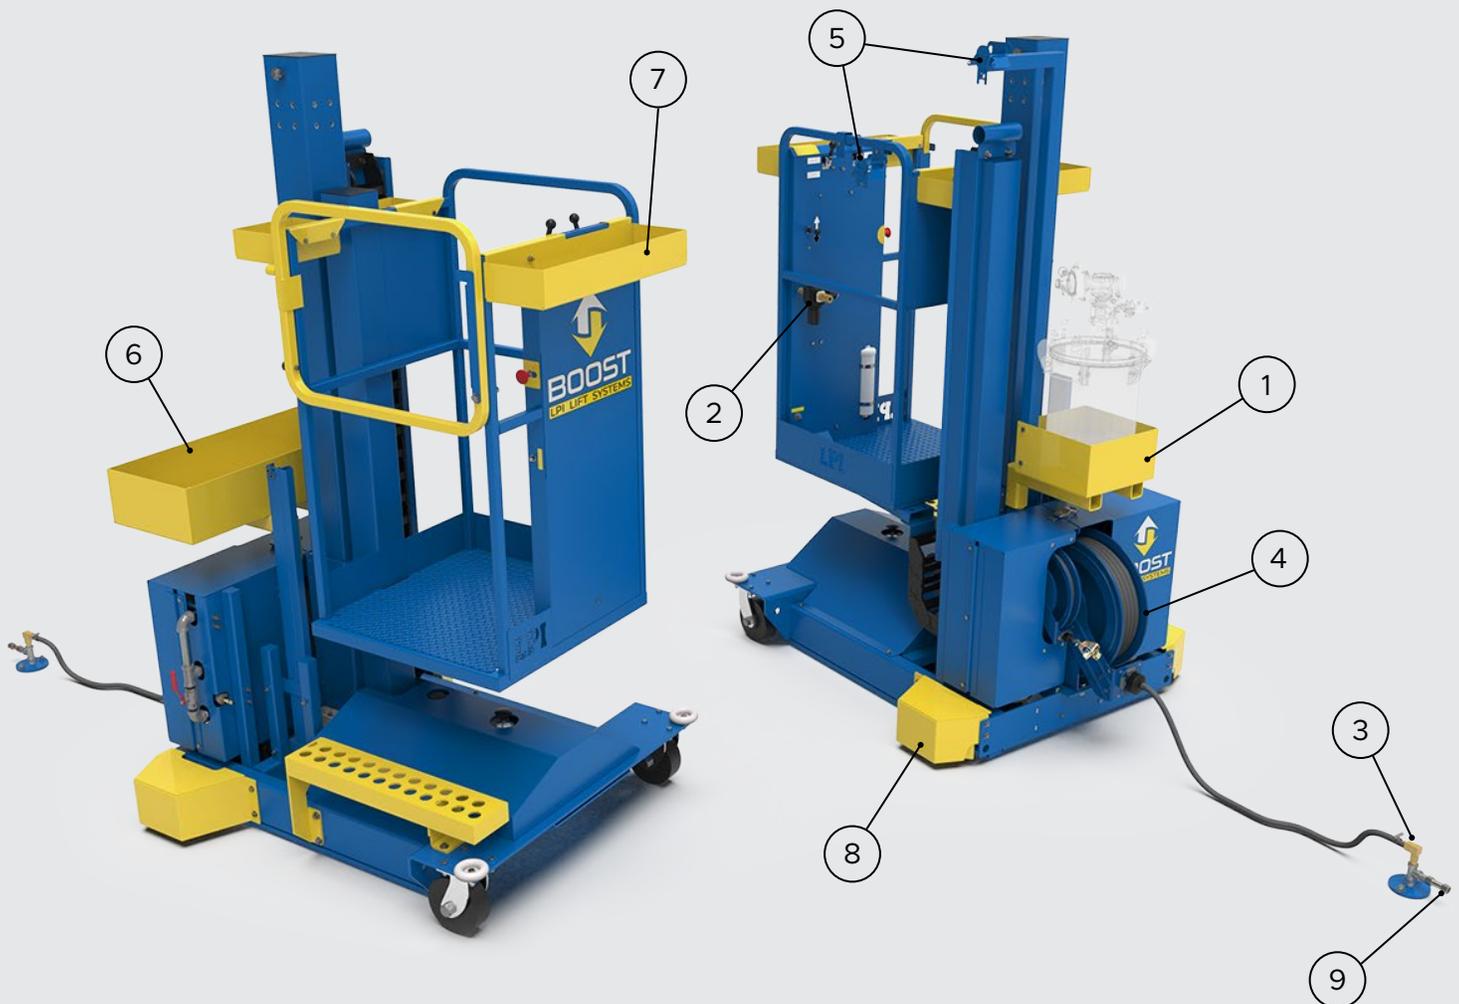

FORKLIFT POCKETS FOR DISTANCE TRANSPORT

Worker Safety is our #1 Goal!

The BOOST lift is a slab type machine intended for operation on a flat, level surface only.

Application specific options add convenience and value!

Item	P/N	Description
1	201-7465	Paint pot carrier kit. Designed for 2.8 gallon paint pot or smaller. (Paint pot not included)
2	202-5263	Auxiliary air regulator with gauge kit. (Inside platform for auxiliary tools)
3	204-2272	360° swivel air connection kit. Allows for 360° of travel from air supply source.
4	204-2280	Static discharge reel kit.
5	204-2281	Paint gun hook kit.
6	204-2283	Base mounted tool tray kit.
7	204-2284	Front platform tool tray kit.
8	201-2285	Wide wheel drive kit. Recommended for grated floors. (Adds 4.5" to total width)
9	970-0530	Safety auto-shutoff valve.

Applications

LPI's BOOST lift with non-electric motors, is designed for use in paint booths or other hazardous environments where combustible dusts or vapors may be present.

Use applications include:

Paint Booths
Paint Prep Areas
Paint/Surface Inspection Areas
Paint Kitchens

Sanding/Buffering Areas
Vehicle Assembly Areas
Welding Areas
Large Scale Fabrication/Manufacturing

Do away with repositioning of ladders and potential slipping and fall hazards! The BOOST lift is the ideal solution for providing workers security and peace of mind when working at heights.

About LPI Lift Systems

LPI, Inc. is a standard and custom equipment manufacturer providing engineering services and manufacturing expertise in the design and construction of work platforms, fall protection, and personnel lifting equipment for a wide range of industrial applications and facility maintenance. LPI has been in business for over 40 years providing manufacturing and assembly support for customers in a variety of industries and custom applications.

LPI lift products help promote a safe and ergonomic work environment which helps increase worker productivity and reduce work-related accidents and injuries.

LPI lift equipment meets applicable OSHA/ANSI standards, and is designed, manufactured and assembled in the U.S.A.!
